

REMARKS

The present amendment is submitted to eliminate multiple dependencies and to correct minor typographical errors. The amendments were not intended to and should not be construed to have been made for any reasons related to patentability of the claims.

Attached hereto is a marked-up version of the changes made to the claims by the current amendment. The attachment is captioned "Version with Markings to Show Changes Made".

Respectfully submitted,

Kevin J. Stein
Reg. No. 47,966
Attorney for Applicant(s)

VERSION WITH MARKINGS TO SHOW CHANGES MADE

3. (Amended) An acylated cellobiose according to claim 1 ~~or 2~~ wherein the R residue is linear.

7. (Amended) An acylated cellobiose according to ~~any one of claims 1, 2, 3, 4, 5 or 6~~ claim 1 wherein each R residue is the same.

8. (Amended) An acylated cellobiose according to ~~any one of claims 2, 3, 4, 5 or 6~~ claim 1 wherein each X represents an R-CO- group.

18. (Amended) An acylated cellobiose according to ~~any one of claims 1, 11 or 15~~ claim 1 wherein the major fraction and preferably at least 90% of the acylated cellobiose is the α anomer.

19. (Amended) An acylated cellobiose according to ~~any one of claims 1, 11 or 15~~ claim 1 wherein the major fraction and preferably at least 90% of the acylated cellobiose is the β anomer.

20. (Amended) An acylated cellobiose according to ~~any one of claims 1, 11 or 15~~ claim 1 wherein not more than 50% of the Z residue represents H.

27. (Amended) A method of thickening or structuring a water-immiscible liquid to form a cream, soft solid or solid comprising the steps of forming a solution of a gellant in the water-immiscible liquid at a temperature above its gelling temperature and thereafter cooling the solution to and maintaining it at below its gelling temperature until its viscosity has increased or until it has solidified wherein the gellant comprises an acylated cellobiose (CHME) as specified in ~~any of claims 1, 2, 3, 4, 5, 6, 7, 10, 11, 15 or 17~~ claim 1.

28. (Amended) A cream, soft solid or solid composition comprising a water-immiscible liquid structured or thickened by an effective amount of a gellant in which the gellant comprises an acylated cellobiose (CHME) as specified in any of claims 1, 2, 3, 4, 5, 6, 7, 10, 11, 15 or 17 claim 1.

32. (Amended) A composition according to claim 28 in which said acylated cellobiose CHME is employed in conjunction with a gellant (ACB) that is represented by the formula:

33

in which X represents an acyl group (R-CO-) or H, being not more than a minority of X residues and R represents a saturated or unsaturated, linear or branched chain hydrocarbon residue containing from 5 to 31 carbon atoms.

3433. (Amended) A composition according to claim 32 in which said acylated cellobiose CHME is employed in a weight ratio to said ACB of from 25:1 to 1:25, preferably from 1:1 to 1:12.

3534. (Amended) A composition according to claim 32 in which said CHME and said ACB are present in a weight ratio in the range of from 15:85 to 35:65.

3635. (Amended) A composition according to claim 32 in which the CHME comprises cellobiose heptadecanoate mono benzoate and the ACB comprises cellobiose octadecanoate.

3736. (Amended) A composition according to claim 35-34 in which the CHME is at least 90 molar% β anomer and the ACB is at least 80 molar% α anomer.

3837. (Amended) A composition according to claim 28 which additionally contains one or more active agents selected from skin benefit agents, personal care agents, medicaments, sunscreen or tanning aid.

3938. (Amended) A composition according to claim ~~37~~36 in which the active agent is dissolved or suspended in the water-immiscible liquid.

4039. (Amended) A composition according to claim ~~37~~36 in which said personal care agent comprises an antiperspirant or a deodorant.

4140. (Amended) A composition according to claim ~~39~~38 in which the antiperspirant salt comprises selected from aluminium chlorohydrate, activated aluminium chlorohydrate, aluminium/zirconium chlorohydrate and a complex of aluminium and zirconium chlorohydrate with glycine.

4241. (Amended) A composition according to claim ~~39~~38 in which the antiperspirant is suspended in the water-immiscible liquid and the composition is translucent.

4342. (Amended) A composition according to a claim 28 in which the thickened or structured water-immiscible liquid forms an emulsion or micro-emulsion with an aqueous or water-miscible liquid.

4443. (Amended) A composition according to claim ~~34~~33 in which the or one active agent is dissolved in the aqueous or water-miscible liquid.

4544. (Amended) A composition according to claim ~~42~~41 in which the or one active agent comprises an antiperspirant salt.

4645. (Amended) A composition according to claim 44-43 in which the antiperspirant salt comprises an aluminium salt or an aluminium and zirconium salt.

4746. (Amended) A composition according to claim 45-44 in which the antiperspirant salt is selected from aluminium chlorohydrate, aluminium/zirconium chlorohydrate and a complex of aluminium and zirconium chlorohydrate with glycine.

4847. (Amended) A composition according to claim 42-41 in which the emulsion is a water-in-oil emulsion.

4948. (Amended) A composition according to claim 47-46 in which the emulsion is transparent or translucent

5049. (Amended) A composition according to claim 48-47 in which the emulsion is a transparent or translucent stick.

5150. (Amended) Cosmetic use of a composition according to claim 28 in which the composition is applied topically to skin.
